Cyber Solutions IT service process.

Our IT Service Process

Our first order of business is assessing your system and IT needs. Once we understand and map your system network, we implement a management plan to monitor and maintain it. Our IT management plan organizes its work around IT system thresholds designed to keep your system running smoothly and flawlessly. Reports triggered by any system malfunction result in proactive action by our technicians. We keep you informed of your IT network health by sending you monthly status reports. The result is your piece of mind and knowing that Advanced Cyber Solutions gives you the best IT service money can buy.

Our service model:

Advanced Cyber Solutions offers subscription based, multiple tiered services. We feel that you will find one that agrees with your budget and needs. Ask for our volume and annual contract savings.

Basic

- Remote PC Health Monitoring
- Remote Maintenance
- 24/7 Help Desk

Corporate (includes)

- Software Security Updates Mgt
- Security Awareness Training
- Monthly Status Report

Professional (includes)

- Asset Inventory and Management
- Antivirus and Patch Management
- Monthly Systems Status Reports

Executive

- Same Day Tech Assist
- Tailored Security Training
- Individualized Status Report

Who has access to your data?

Regardless of the IT functions or services you are using, Access Control is essential. It is your first line of defense.

- Password protect your system
- Make PW difficult to guess
- Change your passwords often
- Do not reuse the same password
- Train your personnel

Let us show you how!
